

Sandip Baliram Tawhare

Senior Backend Engineer | Laravel / PHP | APIs, AWS & DevOps

+91 9527849688 sandiptahware18081998@gmail.com sandiaptawhare.com [LinkedIn: sandip-tawhare-coder](#)
[GitHub: codersandip](#) Pune, Maharashtra, India

Professional Summary

Senior Backend Engineer with **7+ years** of experience building scalable, high-performance web applications and APIs using **Laravel, PHP, MySQL, Redis, and AWS cloud infrastructure**. Experienced in microservices architecture, DevOps automation, CI/CD pipelines, payment gateway integrations, and system optimization. Active open-source contributor with multiple Laravel packages used by the developer community.

Backend Expertise

- REST API Development
- Authentication & Authorization
- Payment Gateway Integrations
- Queue Systems & Background Jobs
- Caching & Performance Optimization
- CI/CD & DevOps Automation
- Scalable System Design
- Cloud Infrastructure (AWS)

Achievements

- Improved API response time by up to 40% through query optimization, indexing, and backend refactoring.
- Reduced media storage usage by 30 - 50% using automated image optimization workflows.
- Published 7+ open-source Laravel packages focused on APIs, payments, auditing, and developer productivity.
- Designed scalable backend architectures using asynchronous processing, caching strategies, and cloud-native deployment workflows.
- Delivered production REST APIs across 5+ business domains, including vehicle services, education ERP, eLearning, insurance, and car care.

- Automated CI/CD deployment workflows using GitHub Actions, reducing manual release effort and improving deployment consistency.

Core Skills

Backend: PHP, Laravel, CodeIgniter, Node.js, Sails.js, REST APIs, Queues, Webhooks, Payment Gateways

Frontend: JavaScript, React.js, Vue.js, HTML, CSS, Tailwind CSS

Databases & Cache: MySQL, MongoDB, Redis, Query Optimization, Indexing, Caching Strategies

Architecture & Security: SOLID, Design Patterns, Repository Pattern, Service Layer, Microservices, JWT, OAuth 2.0, API Security

Cloud & DevOps: AWS EC2/S3/RDS/Lambda/CloudFront, DigitalOcean, Cloudflare, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, CI/CD

Tools & Testing: Git, GitHub, GitLab, Bitbucket, Composer, NPM, Postman, PHPUnit, Linux/Ubuntu, Nginx, Apache, SSH

Professional Experience & Projects

Vioron Internet Pvt Ltd | Jan 2025 - Present

Software Development Engineer (Laravel / PHP Backend)

Project: Youhonk | **Stack:** Laravel 8, MySQL, Vue.js, AWS EC2/S3/Lambda, Redis, Ubuntu, Nginx, Apache, Bitbucket

- Built scalable Laravel REST APIs, queue workflows, scheduled jobs, and real-time notifications for a vehicle service marketplace.
- Optimized database queries, indexing, eager loading, and media processing, improving API speed by up to 40% and reducing storage usage by 30 - 50%.
- Managed AWS and Ubuntu production deployments using Nginx, Apache, PHP-FPM, Redis, and automation-friendly Artisan commands.

Sarvacharya Education Pvt Ltd | Apr 2024 - Jan 2025

Senior Laravel Developer

Project: 3G Content ERP | **Stack:** Laravel 9, MySQL, GitHub Actions, React.js, Ubuntu, CI/CD

- Developed ERP modules for class scheduling, student management, attendance tracking, and automated question paper generation.
- Improved performance and maintainability through query optimization, backend refactoring, debugging, and monitoring.
- Implemented GitHub Actions CI/CD workflows to automate deployments and reduce release effort.

Paradiso Software Pvt Ltd | Mar 2023 - Apr 2024

Laravel Developer

Project: CogniSpark AI | **Stack:** Laravel 9, AWS EC2/S3, MySQL, JavaScript, Ubuntu

- Built Laravel backend modules for an AI-powered eLearning authoring platform with high-volume content workflows.
- Improved scalability through optimized database design, efficient backend processing, and AWS-hosted production support.
- Collaborated with product and UI/UX teams to deliver responsive authoring experiences and automation features.

Fyntune Solution Pvt Ltd | Jan 2021 - Feb 2023

PHP Developer

Project: Fynity.in | **Stack:** Laravel, React.js, AWS EC2/RDS/S3, GitHub Actions, REST/SOAP APIs

- Developed Laravel APIs for Fynity.in, an insurance aggregation platform with real-time quote generation and premium calculation workflows.
- Integrated payment gateways, REST/SOAP provider APIs, AWS services, GitHub Actions deployments, and React.js frontend workflows.

Leanquality Solutions India Pvt Ltd | Jun 2019 - Dec 2020

Web Developer

Project: Carselonadaily | **Stack:** Sails.js, Node.js, MySQL, AWS EC2, JavaScript

- Developed and maintained Carselonadaily, a car care and detailing platform, using Sails.js, Node.js, MySQL, CodeIgniter, and Laravel.
- Refactored backend code, handled client requirements, and managed AWS EC2 deployments for stable hosting and better maintainability.

Featured Open Source Projects ([@codersandip](#))

Laravel API Toolkit

Production-ready API scaffolding for Laravel -- standardized JSON envelope, exception -> HTTP mapper, query filters & sorters, Sanctum-ready auth helpers.

<https://github.com/codersandip/laravel-api-toolkit>

Laravel Multi Payment Gateway

Unified abstraction over Stripe, Razorpay, PayPal, and more. Switch gateways with a config change -- checkout code never changes. Pluggable driver architecture with built-in webhook signature verification.

<https://github.com/codersandip/laravel-multi-payment-gateway>

Laravel Audit Pro

Enterprise-grade Eloquent model auditing with field-level diffs, user & IP attribution, configurable retention, and one-click restore from audit log.

<https://github.com/codersandip/laravel-audit-pro>

More open-source projects are available at github.com/codersandip.

Education

Bachelor of Computer Engineering (Pursuing) | Rajiv Gandhi College of Engineering, Pune |

Expected Graduation: 2027

Diploma in Computer Engineering | Samarth Polytechnic Belhe, Pune | 2020 - 2022 | 81.00%
